Your do’s and don’ts for the next 30 days.

Ten rules built from your own trades: 5 trades (Mar 2025). Each rule shows your number today and a target for the month. Your full analysis is on your dashboard. Keep this page where you trade.

✓ Do

1. Decide your maximum loss per trade before you enter.

Why: Your largest loss was −₹4,094.

Now **−₹4,094 largest loss** → Target **₹2,000 or less**

2. Review your 3 biggest losses this week.

Why: They cost −₹8,629, 84% of everything you lost.

Now **84% of losses** → Target **reviewed by Friday**

3. Write one line on why you took each trade.

Why: A short note turns your 5 trades into lessons you can check at the next review.

Now **5 trades in this report** → Target **a note for every trade**

4. Check this plan every Friday.

Why: Ten minutes a week with the check-in below shows which habits are sticking before the month is over.

Now **Not tracked** → Target **4 Fridays**

5. Set a daily loss limit and stop when you reach it.

Why: A fixed daily limit keeps one bad day from becoming a bad month.

Now **Not tracked** → Target **every day**

× Don’t

1. Don’t hold a losing position past −2%.

Why: 4 positions went past −2% and cost −₹10,132.

Now **4 positions** → Target **0**

2. Don’t trade again the same day after a loss.

Why: 4 times you entered again the same day after a loss; those trades lost −₹7,767.

Now **4 same-day re-entries** → Target **0**

3. Don’t trade TCS this month.

Why: TCS lost −₹4,094 on just 1 trade.

Now **1 trade** → Target **0**

4. Don’t let one trade decide the month.

Why: Your worst trade, −₹4,094, was 40% of everything you lost.

Now **40% of losses** → Target **under 25%**

5. Don’t keep trading through a losing streak.

Why: Your longest run was 5 losses in a row, costing −₹10,221.

Now **5 losses in a row** → Target **stop after 3**
