Your do's and don'ts for the next 30 days.

Ten rules built from your own trades: 96 contracts (Jan–Mar 2025). Each rule shows your number today and a target for the month. Your full analysis is on your dashboard. Keep this page where you trade.

✓ Do

1. Write your exit before you enter, then keep it.

Why: 29 contracts went past −10% and cost −₹1,91,773.

Now **30% of contracts past −10%** → Target **under 15%**

2. Stay with what you know best.

Why: Equity made +₹1,90,790 over 41 trades; your results are strongest where you trade most carefully.

Now **6 names traded** → Target **fewer, familiar names**

3. Decide your maximum loss per trade before you enter.

Why: Your largest loss was −₹15,917, about 1.9× an average win.

Now **−₹15,917 largest loss** → Target **₹8,500 or less**

4. Review your 3 biggest losses this week.

Why: They cost −₹44,572, 22% of everything you lost.

Now **22% of losses** → Target **reviewed by Friday**

5. Write one line on why you took each trade.

Why: A short note turns your 96 contracts into lessons you can check at the next review.

Now **96 contracts in this report** → Target **a note for every trade**

✕ Don't

1. Don't hold a losing option past −30%.

Why: 16 contracts went past −30% and cost −₹87,686.

Now **16 contracts** → Target **0**

2. Don't trade again the same day after a loss.

Why: 19 times you entered again the same day after a loss; those trades lost −₹30,306.

Now **19 same-day re-entries** → Target **0**

3. Don't trade BANKNIFTY options this month.

Why: BANKNIFTY options lost −₹26,902 on just 8 contracts.

Now **8 contracts** → Target **0**

4. Don't keep trading through a losing streak.

Why: Your longest run was 5 losses in a row, costing −₹41,166.

Now **5 losses in a row** → Target **stop after 3**

5. Don't trade more often than your plan allows.

Why: You averaged 8.5 contracts a week between 6 Jan and 26 Mar.

Now **8.5 a week** → Target **8 or fewer**
